About Vortic United

In 2020, an idea was sparked by Jensen Robles, the visionary CEO and founder of Vortic United. He envisioned a platform that would break down barriers and make institutional trading systems accessible to everyone.

After months of meticulous planning, Vortic United entered the pre-launch stage in September 2022. With a relentless pursuit of perfection, the team refined the platform to meet the highest standards. The dedication and hard work paid off as Vortic United achieved a significant milestone on December 27, 2022, with its global launch and international expansion. The rapid recognition worldwide quickly propelled the company into the global spotlight.

Creating a New Standard for Trading Access

At Vortic United, we are driven by a clear and unambiguous vision. We aim to become a pioneering force in the world of crypto currencies, revolutionizing the way people access and benefit from the highly complex crypto market. Our main goal is to create a vibrant and inclusive community that unlocks the potential of the crypto market for everyone.

What motivates us the most is to see our customers success, that is why we're always improving our services and trying to raise the bar as high as possible.

Leading the Change: Reshaping Finance Through Accessibility

We believe that everyone should have the opportunity to participate in the financial markets, regardless of their background or experience. By breaking down barriers and simplifying the complexities of the crypto market, we are democratizing finance and empowering individuals to take control of their financial future.

Our commitment to accessibility goes beyond just providing trading services. We are building a supportive community where knowledge is shared, ideas are nurtured, and collaboration is encouraged.

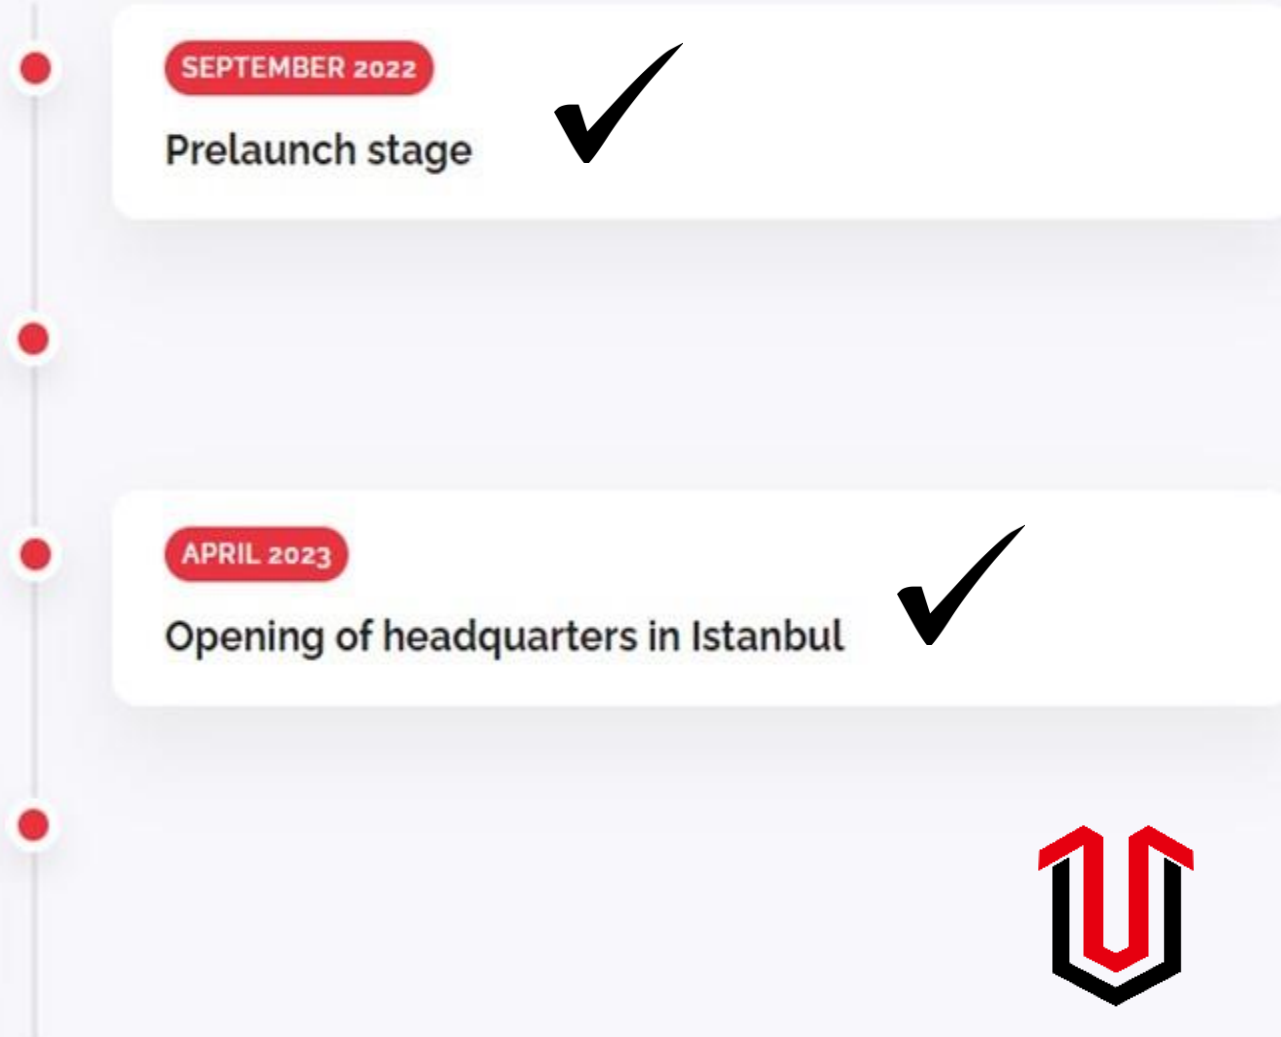

Charting a New Course

Through our innovative approach, we are paving the way for a new standard of trading access. By providing reliable and user-friendly platforms, tools, and resources, we empower individuals to navigate the complexities of the crypto market with confidence. Our community members have the opportunity to seize unique prospects and make a significant impact on the crypto market.

Roadmap

We have already made significant strides in our journey, and our roadmap outlines the exciting milestones that lie ahead:

Join us on this exhilarating journey as we reshape the future of finance and create a world where everyone can thrive in the crypto market.

Our Vision.

Visionaries see what others may believe.

Our vision is clear. Vortic United is becoming one of the first **reliable** companies that is simplifying this highly complex world of cryptocurrency.

Our main goal is to create a community that benefits from different aspects of the crypto market.

Our community will benefit from unique opportunities within cryptocurrency and we will have a significant impact on the crypto market with all of our upcoming projects.

About Vortic United.

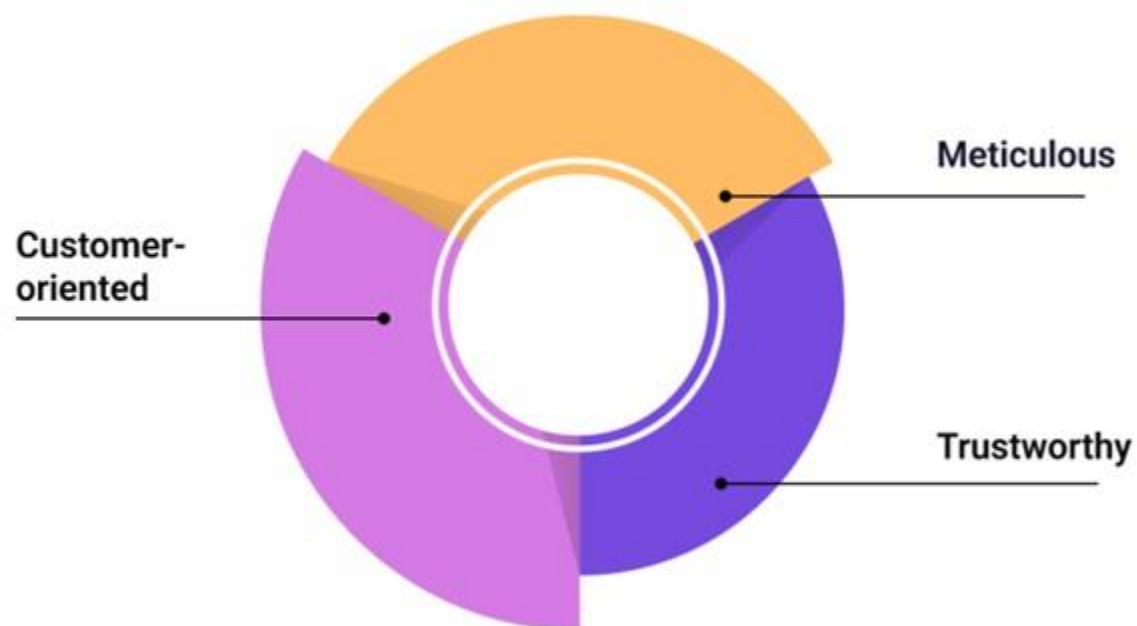

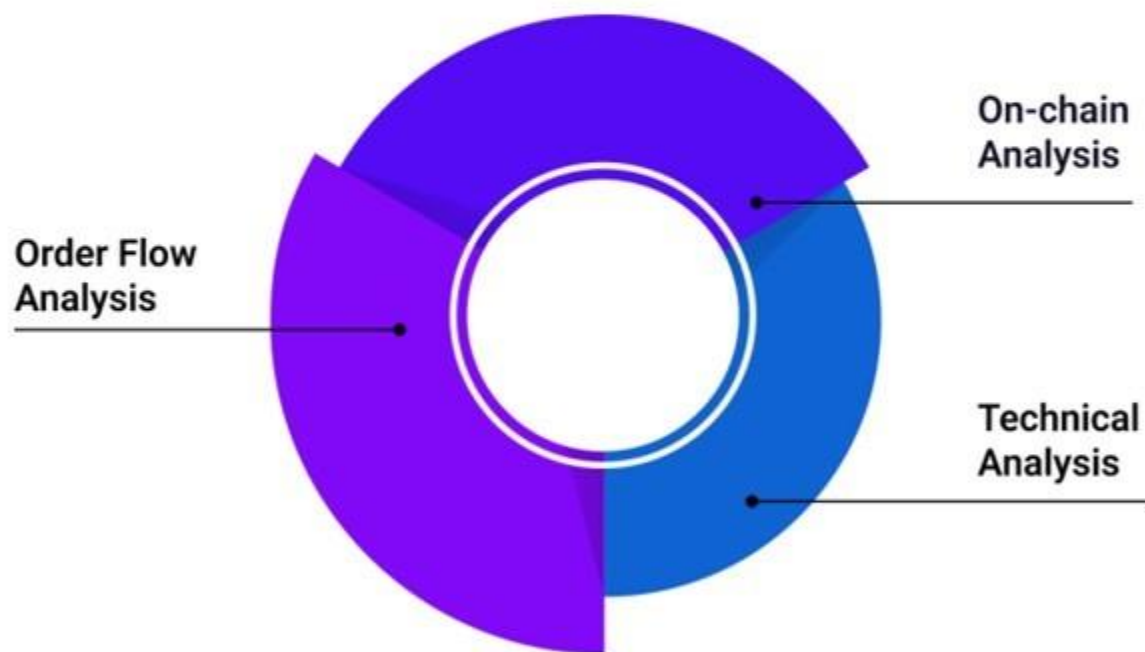

Our expert employees perform at their best each and every day to help you achieve your financial goals.

Security is our top priority, which is why we work with diversified packages that are managed exclusively with our latest and proven strategies

Key Competencies

How we generate rewards.

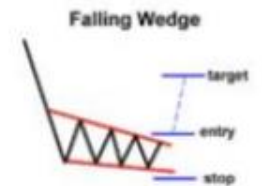

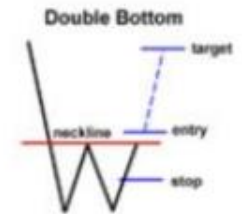

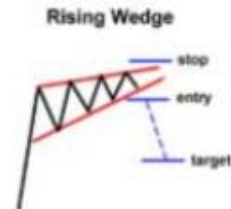

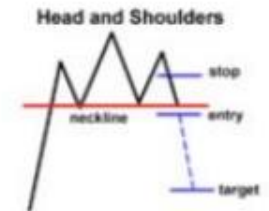

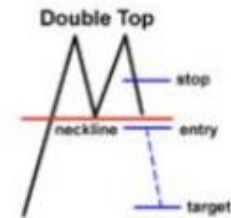

To secure all the deposits of our clients, we work with a strategy based on diversification and focused on profitability.

Trading decisions are made based on our three-point analysis.

Technical analysis.

- Technical chart analysis is based on recurring trend patterns.
- Historical data can be used to determine the probability of such patterns repeating.
- For us, technical analysis is part of the decision-making basis for a possible trade.

On-Chain Analysis.

- Bitcoin is the number 1 cryptocurrency and altcoins move in correlation to bitcoin. All transactions can be viewed transparently on the blockchain.
- Transaction behavior can be processed and visualized with the help of on-chain indicators. Since these data are based on facts and events and not only on probabilities, valuable information can be gained and used for trading.

Orderflow Analysis.

We mainly use orderflow trading to manage portfolios.

Orderflow trading is based on market data and is used by institutions and professional trading firms. It is considered one of the most sophisticated but reliable strategies and basically a deep analysis of supply and demand.

While most traders in the crypto market rely on technical analysis only, the analysis of order books and order flow can be a decisive advantage.

CLIENTS

Trading cryptocurrencies is not an easy task for private and institutional clients, as there are many factors that can have a big impact on the overall market.

If you are not actively involved with the cryptocurrency markets, it's nearly impossible to manage the risks associated with them.

To minimize the risk of your time, and your crypto, Vortic United manages them for you while working hard to increase your profits.

Client Packages

- We cannot promise you a fixed return, as our performance is variable depending on the market conditions. But based on our average past results we can give you approximate expectations.
- Crypto Packages A, B, and C, and D have a fixed term, which varies depending on the package that you choose. Once a package reached the duration of its term, it no longer generates rewards and 80% of the deposits are credited to your wallet and are available for withdraw.
**Weekly withdrawals of crypto rewards is allowed.*
- The Compounding Package is compounding the daily interest for a larger reward at the end of each week. Once the Package duration has expired, your wallet will be credited with the total accumulated profits over 32 weeks, along with 80% of your original deposit amount.
